

**International Demonstration Project on Japan's Technologies for Decarbonization
and Energy Transition : Feasibility Study 2025 2nd. Public Solicitation Result**

No.	Provisional Project Name	Entities Note: (○) shows the leader of consortium
1	Demonstration research to realize energy management in gated town (Thailand)	Panasonic Corporation
2	Demonstration research on sorghum agricultural residue resource utilization technology for biomass fuel procurement (India)	NISSAN Motor Co., Ltd.
3	Demonstration Research on a Hydrogen Production System Utilizing Reversible Solid Oxide Cells for Economic Efficiency Improvement (Australia)	Niterrra Co., Ltd. (○) Japan Carbon Frontier Organization
4	Feasibility Study for a Next-Generation Energy Platform for Promoting the Adoption of Electric Motorcycles – Demonstration Research (Thailand)	naturenix Co., Ltd.

Note:

Provisional project names are subject to change after the signing of contracts between the entities and NEDO.

This information is only to announce that the entities have been selected for the basic study stage of the project scheme and does NOT give any guarantee about the progress of each project to later stages (i.e., the feasibility study and demonstration stages).

The progress of each project to the later stages is subject to further screening and evaluation.
